- Polish - Native
- English - C1
- Spanish - B2
- Mandarin - HSK2

INTERESTS

- Hiking
- Economics
- Literature
- Language learning

WORK EXPERIENCE

DATA LEAD

edrone (CRM & Marketing Automation SaaS) | Feb 2026 to now

edrone is an ecommerce-dedicated CRM, Marketing Automation and AI platform used by online stores across Europe and Latin America.

- Owning analytics across the company — what gets measured, what each number means, and who decides from it — partnering with C-level leadership to prioritize initiatives and enable data-driven decision-making
- Rebuilt the data architecture into a gold layer, one definition per business concept: correct answers to a fixed evaluation set of business questions went from 33% to 70%
- Moved reporting off Tableau onto an in-house tool open to everyone — monthly data users grew from 11 to 103 out of 170 employees in four months
- Leading Product-Led Growth: doubled registration conversion from 6.5% to 13% in four months across four changes, each measured on its own to isolate what actually worked
- Mentoring developers, designers, and team leads in adopting a data-driven approach — agreeing success metrics before building and evaluating performance against them afterwards

DATA ANALYTICS INSTRUCTOR

Mate academy (EdTech) | Apr 2025 to now

- Teaching A/B testing and product analytics to career changers with no technical background — translating experiment design and metrics into language a non-analyst can act on
- Built the Data Analytics course and recorded its video modules: Tableau, Excel and Google Sheets

SENIOR PRODUCT DATA ANALYST

Docplanner (Healthcare Marketplace & SaaS) | Jul 2022 to Jan 2026

Docplanner is one of the first Polish unicorns and currently the world's largest healthcare platform, operating in 13 countries and serving over 90 million patients each month.

- Co-defining strategy, objectives and projects with product directors, and owning the KPI definitions used to measure the Product Team's initiatives
- Identifying opportunities in data to accelerate product adoption, retention, engagement, and monetization
- Designing, executing, and evaluating A/B tests across the onboarding and activation journey
- Ran an onboarding experiment that removed the Customer Success call to test self-serve setup: wizard completion rose from 16% to 54%
- Mapped and ranked Customer Success interventions by their impact on doctors, then shaped and measured the in-product hint engine that took the simple ones over: 15x the reach of the CS team, 5x more doctors converted and ~€1M of CS workload removed
- Training and mentoring new analysts joining the company and enabling Product Managers so they can use self-service analytics (Amplitude, SQL)

SENIOR DATA ANALYST

ING (Banking) | Jan 2020 to Jun 2022

- Complex analysis of bank's segment (Self-Employed Clients) used to define strategy with stakeholders and benchmark the bank against the market
- During Covid created and distributed datasets among Sales Network employees with data personalized offers for clients. 16% of credit sales were generated thanks to these datasets
- Optimized work of the team by 30 hours per month by automating or changing the scope of the reports
- Led the implementation of CRM system for Sales Network (ca. 300 employees)

DATA ANALYST

ING (Banking) | Nov 2018 to Dec 2019

- Quantitative analysis of customer behavior: statistics, profiles, segmentation and ways of using Bank's products
- On-going dashboards measuring the effectiveness of marketing communication

PRODUCT MANAGEMENT INTERN

ING (Banking) | Dec 2017 to Oct 2018

- Working on implementation of Google Pay & Apple Pay for ING Customers, analyzing customer web behavior with Adobe Analytics

EDUCATION

UNIVERSITY OF ECONOMICS IN KATOWICE

Computer Science (Msc) | 2020 - 2022

UNIVERSITY OF ECONOMICS IN KATOWICE

Finance & Accounting (Bsc) | 2017 - 2020
